PROFESSIONAL PROFILE

Software developer focused on frontend development with Angular, React, and TypeScript. Experience building enterprise web applications, dashboards, and REST API integrations for public sector, academic, and private organizations. Currently developing multiple business platforms while collaborating directly with clients to deliver digital solutions. Interested in building maintainable, reusable, and user-focused interfaces.

PROFESSIONAL EXPERIENCE

Orbitas Software Development — Full-Stack Developer

Jun 2025 – Jun 2026 | Professional Services Contract

- Develop and maintain enterprise web applications for multiple clients across various industries.
- Build interfaces using React, Nuxt, and Blazor integrated with REST APIs.
- Built production-grade REST APIs serving as the backbone of the system interface layer, handling authentication, validation, and error handling.
- Collaborate directly with clients for requirements gathering and feature validation.

National University — Back-End Developer, Hotel Management System

Jul 2025 – Nov 2025

- Developed backend modules using Laravel and MySQL.
- Implemented logic for check-in, check-out, and room assignment.
- Added validations to improve data integrity.
- Built REST APIs used by the system interface.

Municipality of Nicoya — Full-Stack Developer, Citizen Portal

Jan 2024 – Jun 2025

- Built public forms and admin dashboards using React, TypeScript, and NestJS.
- Implemented authentication, validations, and request tracking.
- Digitalized administrative processes related to maritime-terrestrial permits.
- Integrated frontend interfaces with backend services through REST APIs.
