PROFESSIONAL PROFILE

Full-stack software developer with experience across frontend and backend technologies, including Angular, React, Vue, TypeScript, .NET, Node.js (Nest.js, Express.js), and Laravel. Experience building enterprise web applications, dashboards, and REST API integrations for public sector, academic, and private organizations, with the opportunity to lead select projects, contribute to technical decision-making, and guide junior developers and interns. Currently developing multiple business platforms while collaborating directly with clients to deliver digital solutions. Interested in building maintainable, reusable, and user-focused software solutions.

PROFESSIONAL EXPERIENCE

Orbitas Software Development — Full-Stack Developer

Jan 2025 – Jun 2026

- Develop and maintain full-stack enterprise web applications for multiple clients across various industries, building interfaces with React, Vue, and Blazor alongside backend services integrated through REST APIs.
- Design and build relational databases, modeling schemas and optimizing queries to support scalable and reliable data layers.
- Build production-grade REST APIs using Node.js (Nest.js, Express.js) and .NET, implementing JWT-based authentication, secure cookie handling, input validation, and structured error handling.
- Implement automated tests and CI/CD workflows to ensure reliable, high-quality releases.
- Had the opportunity to lead select projects, participating in technical decision-making and pull request reviews to help ensure scalable, maintainable, and optimized deliverables with reduced load times.
- Guided and trained interns and entry-level developers on select projects, supporting their onboarding and technical growth.
- Collaborate directly with clients for requirements gathering and feature validation.

National University — Back-End Developer, Hotel Management System

Jul 2025 – Nov 2025

- Developed backend modules using Node.js and MySQL, collaborating directly with university stakeholders to gather requirements and validate features.
- Implemented logic for check-in, check-out, and room assignment, with validations to improve data integrity.
- Built REST APIs used by the system interface, implementing JWT-based authentication, secure cookie handling, and structured error handling.
- Wrote automated tests and integrated CI/CD workflows to support reliable deployments.

Municipality of Nicoya — Full-Stack Developer, Citizen Portal

Jan 2024 – Jun 2025

- Built public forms and admin dashboards using React, TypeScript, and Node.js, collaborating directly with municipal staff to gather requirements and validate features.
- Implemented JWT-based authentication, secure cookie handling, and request tracking to protect system access.
- Added validation and structured error handling to improve data integrity, and digitalized administrative processes related to maritime-terrestrial permits.
- Integrated frontend interfaces with backend services through REST APIs, supported by automated tests and CI/CD workflows.

EDUCATION

Bachelor's Degree in Information Systems Engineering — National University of Costa Rica (2025)

TECHNICAL SKILLS

Frontend: Angular, React, Next, Vue, Blazor, TypeScript, JavaScript, HTML, CSS

Backend: .NET (C#), Nest.js, Express.js, Node.js, Laravel (PHP)

Mobile: Flutter (Dart)

Databases: SQL Server, MySQL, MariaDB, Oracle

Tools: Git, GitHub, Azure DevOps, Docker, Postman

Practices: REST APIs, Clean Architecture, Database Design, Automated Testing, CI/CD, JWT Authentication, Code Review, Mentoring

CERTIFICATIONS

- Scrum Fundamentals Certified — CertiProf (2024)
- Claude Code in Action — Anthropic (2025)
- Forensic Computing Bootcamp — Academia Progenios (2025)

LANGUAGES

Spanish (Native) | English (Intermediate B1)
